

# Angel: A New Generation Tool for Learning Material based Questions and Answers

Ariel Blobstein, Daniel Izmaylov, Tal Yifat, Michal Levy, Avi Segal

Automatically creating high quality Q&A for educational material is still a challenge.

Past approaches have shown limited abilities to generate questions targeting high cognitive levels or control question difficulty and complexity.

We harness generative AI for Q&A creation, curation and evaluation by using recent prompting techniques, few-shot samples and Bloom's Taxonomy based instructions.

The Angel Approach:
